Thinh Pham Le Tan

has successfully completed the online Specialization

Data Mining Foundations and Practice

In this Specialization, learners have developed and honed essential data mining skills for discovering patterns in large-scale data sets, with a specific focus on issues related to effectiveness and efficiency. Specific skills include data understanding, preprocessing, warehousing in the data mining pipeline; as well as core data mining methods: frequent pattern analysis, classification, clustering, and outlier detection. Learners have also completed a Data Mining Project, which includes the overall process of formulating, designing, implementing, and reporting a real-world data mining project.

Qin Lv
Associate Professor
Computer Science
University of Colorado
Boulder

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
